PROJECTS

- **Multiplayer game connect 4 in python**

Connect 4 is a token game created with python and modul numpy. Place 4 tokens in a row (vertically, horizontally or diagonally) before your opponent wins. Single player against artificial intelligent and multiplayer also available.

- **Smart parking system**

This project proposes a smart parking system that efficiently manages parking spaces, reducing congestion and driver frustration. The system utilizes Arduino Uno as the microcontroller, interfaced with a 16x2 LCD display (via I2C module) to provide real-time parking availability updates. IR sensors detect vehicle presence, triggering

the mini servo motor to automatically open/close parking gates. The system ensures optimized parking space allocation, minimizes waiting times, and enhances overall parking experience.
