⚙️ SKILLS

- Patient Counselling
- ADR preventing
- Medication knowledge
- Drug interaction
- Dose Calculation and Communication

👍 INTERESTS

Cricket, Volleyball, Learning, Movies, Cycling, Traveling.

🗣️ LANGUAGE

I can speak English, Hindi, Bengali and Odia.

📁 PROJECTS

Antibiotics use in Diabetic foot ulcer in tertiary care hospital

Diabetic foot ulcers (DFU) are a serious complication of diabetes and can lead to infections, gangrene, and amputation. Antibiotics are often used to treat DFUs to prevent or manage bacterial infections and to promote wound healing.

Antibiotics should only be used when there is a bacterial infection present. So it's important to confirm the presence of bacterial infection before prescribing antibiotics.

📍 ADDITIONAL INFORMATION

I am a proud Pharmacist, who is extremely professional about his work, has a desire to do something big in life and is a hardcore sport lover.
