## Objective

Clinical Pharmacist with 4+ years of experience in oncology, specializing in adverse drug reaction (ADR) monitoring, antimicrobial stewardship, and patient safety. Skilled in identifying, assessing, and reporting drug safety data with strong knowledge of pharmacovigilance principles, including case processing, causality assessment, and regulatory compliance. Experienced in managing high-risk medications, including chemotherapy and antibiotics, with a focus on improving patient outcomes. Actively participated in NABH audits (Entry Level and 5th Edition), ensuring adherence to quality and safety standards. Seeking to transition into a Pharmacovigilance/Drug Safety role to contribute to global patient safety.

## Experience

- VS hospitals Chennai** 31/03/2022 - Currently  
Clinical Pharmacist - Oncology department
  - Reviewed and validated chemotherapy prescriptions based on protocols, patient parameters, and dosing guidelines.
  - Monitored patients for adverse drug reactions (ADRs) and managed chemotherapy-related toxicities.
  - Performed medication reconciliation and ensured safe, effective, and rational use of anticancer drugs.
  - Provided drug information and counseling to patients and caregivers regarding chemotherapy, side effects, and supportive care.
  - Collaborated with oncologists, nurses, and healthcare professionals in multidisciplinary team rounds.
  - Assessed dose adjustments based on renal/hepatic function, body surface area (BSA), and lab values.
  - Ensured safe handling, preparation, and administration practices of cytotoxic medications.
  - Reported and documented ADRs and medication errors as per pharmacovigilance guidelines.
  - Participated in clinical audits, case discussions, and evidence-based practice improvements.
  - Maintained accurate patient medication records and treatment documentation.
  - Monitored oncology and sepsis patients for clinical response, infection markers, and optimization of antimicrobial therapy.
  - Ensured appropriate antibiotic usage as per hospital antibiotic policy, including de-escalation, escalation, and duration of therapy.
  - Conducted antimicrobial stewardship activities to prevent resistance and promote rational antibiotic use.
  - Participated in NABH audits (Entry Level and 5th Edition), ensuring compliance with quality and patient safety standards
  - Performed prescription audits and medication chart reviews to ensure accuracy, safety, and compliance.
  - Conducted ward stock audits and ensured proper medication storage and availability.
  - Performed crash cart audits to ensure emergency drug readiness and compliance with safety standards.
  - Applied knowledge of International Patient Safety Goals (IPSG) in daily clinical practice.
  - Maintained accurate documentation and supported clinical audits and quality improvement initiatives.
