## OBJECTIVE

Pharmacist with 3.5+ years of professional experience in pharmacology-based medication dispensing, prescription verification, and patient counseling. Strong understanding of pharmacotherapy principles, dosage calculations, contraindications, and drug–drug interactions. Experienced in medication safety, regulatory compliance, and inventory management. Proficient in pharmacy management software and digital health systems, with working exposure to utilizing AI-tools for interaction screening and evidence-based dispensing. Looking for a progressive opportunity to apply my pharmaceutical knowledge and practical skills while contributing to high-quality patient care and organizational success.

## EXPERIENCE

### Pharmacist

Sri Kanna Medicals | Chennai

Nov 2024 – Present

- Dispense prescription and non-prescription medications accurately while ensuring compliance with pharmaceutical regulations, ethical standards, and patient safety guidelines.
- Review and validate prescriptions for therapeutic appropriateness, dosage accuracy, contraindications, and potential drug–drug interactions prior to dispensing.
- Provide comprehensive medication counseling to patients, including administration instructions, adverse effects, precautions, and adherence guidance.
- Utilize pharmacy management software and computer-based systems for prescription processing, billing, inventory control, and digital documentation.
- Apply digital and AI-platforms to support interaction checks, dosage verification, and evidence-based dispensing decisions.
- Manage inventory operations including procurement, stock monitoring, expiry control, batch tracking, and proper storage of cold-chain and high-risk medications.

### Pharmacist

Mahalakshmi Medicals | Chennai

Oct 2022 – Oct 2024

- Performed safe and accurate dispensing of medications in accordance with legal, professional, and organizational standards.
- Assessed prescriptions for correct dosing, therapeutic suitability, and potential drug interactions to minimize medication errors.
- Counseled patients on appropriate medication use, storage requirements, and possible side effects to promote treatment compliance.
- Maintained accurate pharmacy documentation, including prescription records, controlled drug registers, and transaction logs.
- Operated pharmacy billing and dispensing software to support daily operations and inventory documentation.
- Ensured proper storage, labeling, and handling of medicines while supporting SOP compliance and audit readiness.
