OBJECTIVE

Experienced Physician Associate with expertise in Medical Oncology, Clinical Hematology, and Obstetrics & Gynecology and infertility treatment, dedicated to delivering high-quality, patient-centered care. Seeking to leverage my strong clinical acumen, diagnostic skills, and holistic approach to patient care in a dynamic healthcare environment that fosters continuous learning and professional growth.

WORK EXPERIENCE

WITH 1.5 YEARS EXPERIENCE IN MEDICAL ONCOLOGY AND CLINICAL HEMATOLOGY AT MANIPAL HOSPITALS, YESHWANTHPUR FROM AUGUST 2023 TO FEBURARY 2025

- Continuously enhanced clinical skills through hands-on experience, ward rounds and case discussions.
- Conducted thorough patient assessments, including medical histories, physical exams, case summaries, and ordering lab investigations for pediatric and adult oncology and hematology patients. Assisted in diagnosing and managing various malignancies, including solid tumors and hematological cancers.
- Received training in pain and palliative management units.
- Collaborated with consultants to develop and implement personalized treatment plans, including chemotherapy and supportive care. Monitored patients for treatment responses and side effects, providing timely interventions as needed.
- Educated patients and their families about cancer diagnoses, treatment options, and supportive care measures. Recorded progress notes, assisting for procedures (like BMA, Biopsy and Tapping), prepared discharge and treatment summaries.

AT PRESENT: OBSTETRICS & GYNECOLOGY AT APOLLO WOMEN'S HOSPITAL, GREAMS ROAD, CHENNAI - FROM MARCH 2025 - PRESENT.

- Conducted through physical exams, assessed gynecological health, and managed routine and high-risk obstetric care. Assisted in diagnosing and managing conditions like endometriosis, fibroids, PCOS, and pregnancy-related complications.
- Conducted Prenatal & Postnatal Care and provided postpartum care and education. Provided counseling on contraception, sexual health, prenatal care, and menopause management.
- Supported in managing obstetric emergencies, such as preeclampsia, hemorrhage, and fetal distress.
- Documented patient histories, treatment plans, and outcomes in electronic health records (EHR).

SKILLS

- Inpatient care (including supportive care) Knowledge of professional ethics
- Tumor markers and molecular studies
- IV cannula insertion, IV catheterization Assisted in bone marrow aspiration.
- Also lumbar puncture, Thoracentesis and ascitic tapping.
- Symptoms assessment and palliative care management.
- Preoperative and postoperative management.
- Performed tasks such as suturing and suture removals and wound care.
- Psychosocial care Teleconsultation management.
