PROFESSIONAL SUMMARY

IT professional with 2 years of experience as a Sybase DBA at DXC Technology, supporting Sybase ASE database environments for Deutsche Bank AG. Hands-on experience in database administration, backup and restore, user management, database space management, configuration changes, troubleshooting, upgrades, patching, and database refresh activities. Also experienced as an MIS Executive at Sooriya Hospital, handling operational data, MIS reporting, Excel-based analysis, management reports, PowerPoint presentations, tender documentation, and departmental coordination. Strong foundation in Sybase ASE, MySQL, MS Excel, Windows, and UNIX/Linux environments, with a BCA background.

PROFESSIONAL EXPERIENCE

Database Administration (Sybase) — DXC Technology, Chennai

Aug 2022 – Jul 2024 | Client: Deutsche Bank AG

- Good understanding of Sybase ASE database architecture and configurations.
- Performed login and user creation activities and granted appropriate database permissions.
- Managed DUMP and LOAD operations for full and transaction log database backups and restores.
- Analyzed and implemented changes to ASE configuration parameters for performance and compliance.
- Handled start/stop procedures for both replicated and non-replicated ASE systems.
- Troubleshot basic issues including connection problems and server start failures.
- Monitored and expanded database and transaction log space using ALTER DATABASE.
- Participated in ASE database upgrade processes, patch applications, and post-upgrade testing.
- Performed database refreshes across environments using backup and restore strategies.

MIS Executive — Sooriya Hospital, Chennai

Jul 2025 – May 2026

- Managed Corporate Team and DRT Team data, ensuring accuracy and timely updates.
- Prepared and submitted weekly and monthly performance reports to the COO.
- Created and presented PowerPoint reports and analytical summaries for the CEO and senior management.
- Prepared and maintained documentation for government hospital tenders, ensuring compliance with required standards.
- Generated detailed Doctor–Patient Attendance Reports to monitor consultations and service efficiency.
- Coordinated with various departments to collect, validate, and analyze operational data.
- Supported management in data-driven decision-making through accurate and timely reporting.
- Ensured data confidentiality, accuracy, and completeness across MIS processes.
